Environmental Policy

Principles

- Sustainable development – to produce without unacceptable harmful ecological impact occurring either now or in the future.
- Prevention better than cure- consideration of the environmental impact at the outset of product design.
- Life-cycle approach – from raw materials, to manufacturing, to use and disposal.
- Cooperation with governmental and non-governmental organizations.

Objectives

- Minimise environmental impact during the design phase.
- Reduce or eliminate environmental hazardous substances from our products in both the design and manufacturing processes.
- In manufacturing processes, minimize consumption of water and energy and reduce emissions to air and water.
- Promotion of waste recycling
- Open contact with the authorities and customers.

Support of principles

- Maintenance of an environmental management system.
- Commitment to comply with all applicable laws and regulations.
- Communication of the environmental policy to all our employees.
- Education of our employees to work within the framework set by the Status Scientific Controls environmental policy.
